SUMMARY

Driven Salesforce Administrator with over 9 years of experience in serving diverse user bases and enhancing platform capabilities. Proven expertise in automating processes, improving data accuracy to 100%, and executing largescale data remediation efforts. Skilled in managing CI/CD pipelines and architecting Salesforce solutions. Bringing a strong commitment to improving operational efficiency and user satisfaction, ready to leverage extensive knowledge in Salesforce administration to meet complex business needs.

WORK EXPERIENCE

08/2025 – Present **Salesforce Administrator, Dojo (Payementsense)** Bristol

- Spearheaded operations as the primary Service Cloud Administrator, delivering support to a global user base of 150,000+ merchants across four international markets.
- Architected innovative Screen Flows to automate the contact-to-account linking process, completely eliminating manual entry and achieving 100% accuracy in merchant data.
- Formulated a structured Quick Text library that significantly reduced Agent Average Handle Time (AHT) and standardised communications. Executed
- extensive data remediation and lifecycle cleanup initiatives, addressing queue visibility and performance issues effectively. Oversaw CI/CD pipelines using
- Copado and Azure DevOps, facilitating reliable, zero-downtime software releases. Migrated from legacy profile-based access to a robust Permission Set model,
- enhancing audit compliance and overall security.
  Established data integrity safeguards, including Email Message Validation
- Rules and Tier 1 verification templates.

03/2016 – 08/2025 **Salesforce Administrator / IT Support Analyst, Unite Students** Bristol

- Administered Salesforce across Sales, Service, and Field Service Lightning for a national estate comprising over 150 properties.
- Engineered automated workflows and case routing structures that significantly improved response efficiency for resident support.
- Developed real-time KPI dashboards to provide leadership with insights into SLA performance and case trends.
- Implemented deduplication rules while facilitating integrations with thirdparty housing systems to elevate platform data quality.
- Delivered tailored Salesforce training sessions and crafted documentation to foster team adoption and enhance capability.

06/2012 – 02/2016 **IT Support Analyst / Systems Administrator, Acer UK** London

- Provided expert 2nd/3rd line support across 2,000+ endpoints, skillfully managing Microsoft 365 and Active Directory environments.
- Diagnosed and resolved high-priority technical issues within financial district offices, consistently maintaining strict SLAs.
- Delivered VIP executive support with a strong emphasis on confidentiality and operational resilience.
